

To who it may concern

This letter is in reference to East & West who has worked on our project for approximately 1 years in 2022. The "Sentinel" is a 26-story high-rise consisting of 173 high end concrete condo and 6 wood framing TH in West Vancouver. East & West was contracted to supplied & installed all aluminum guardrails and handrails for the entire projects as well as engineering. The balcony / deck on the typical floors up the tower were over size resulting in extensive and lengthy guardrails.

My experience working East & West team was pleasant and memorable. We had on average 170-230 workers daily requiring constant coordination and cooperation among trades. East & West's foreman on site was very accommodating and prompt when asked for specific tasks. A rare quality in in recent years which makes the world go round. The quality of the work was good; both the architect and owner's group along with ITC are very happy with the final product. The entire project was successfully completed without any safety incidents, East & West displayed a strong safety culture throughout the process.

I can confidently recommend East & West and I stand strong beside them in their future business endeavours. It is my pleasure to write this letter as a token of appreciation towards East & West.

Sincerely,

ITC Construction Group

Luc Martin

Senior Superintendent
